

Grow with Edmark Math!

Comprehensive, curriculum-based programs help K-10 students master mathematical concepts and improve problem-solving abilities.

Mighty Math® Carnival Countdown®

Grades K-2 Students learn addition and subtraction, place value, early multiplication, patterns, and 2D shapes.

Mighty Math® Number Heroes®

Grades 3-6 Students practice fractions, 2D geometry, probability, shape and number patterns, addition, subtraction, multiplication, division, and decimals. Two unique on-screen calculators display steps required to solve a problem.

Mighty Math® Astro Algebra®

Grades 7-9 Students rocket through a series of missions, learning how to graph functions, translate word problems into solvable equations, and model algebraic expressions.

Math Review Software!

MindTwister Math™

Grades 3-4 An engaging review of third-grade math and problem-solving skills in a fast-paced, multi-player game show format. Students are encouraged to build quick recall skills, solve word problems, make mental calculations, build estimation skills, and gain fluency of math facts while engaged in higher-order thinking.

Mighty Math® Zoo Zillions®

Grades K-2 Introduce students to story problems, counting money and making change, addition and subtraction facts, and early 3D geometry.

Mighty Math® Calculating Crew®

Grades 3-6 Students master topics including multiplication and division of whole numbers and decimals, number line concepts, 2D and 3D shapes and their properties, and money transactions. Two unique on-screen calculators display steps required to solve a problem.

Mighty Math® Cosmic Geometry

Grades 7-10 Students master geometry basics including attributes of shapes and solids, constructions, transformations, 2D and 3D coordinates, and the relationships between length, perimeter, area, and volume.

True Network Versions, State Curriculum Correlations, and NCTM Standards Available!
